SchoolGuard

The AI-powered case management platform that helps Dutch teachers resolve bullying incidents faster, with less paperwork and more confidence.

The Crisis

Teachers Are Drowning

2,317

psychosocial violence dossiers in Dutch schools (2023-24)

33%

increase in dossiers over just two years

211,000+

students affected by bullying annually

3+ hrs

per week per case lost to manual admin

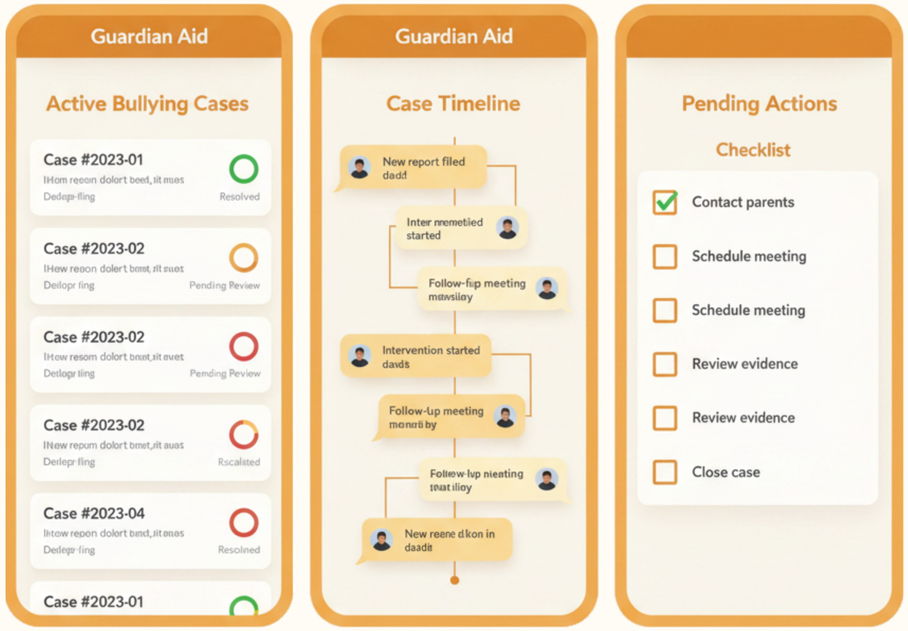
In Norway, 50% of teachers leave the profession within 4 years

Teachers report "handelingsverlegenheid" — a crisis of intervention confidence

June 2024: historic peak of 529 reports in a single month. **Bullying is extremely underreported**!

The Solution

One Platform. Full Clarity.



Centralized Case Management

Replace email, paper files, and Excel with one encrypted dashboard

AI Legal Guidance

Automated checklists adapted to local Dutch regulations

Secure Communication

Students, parents, and authorities — one secure channel

Cloud-First

Real-time alerts and case updates from anywhere

SchoolGuard MVP

Jurisdiction-Aware Anti-Bullying Resource Discovery

FRONTEND

React + Vite + TS

Discovery Form · Review Panel · Resource Viewer · Case Lifecycle · Report Page

▼ HTTP REST

BACKEND API

Node.js + Express

AWS API Gateway + AWS Lambda

/api/jurisdiction · /api/resources · /api/cases

Jurisdiction Discovery Svc · Resource Routing Svc · Case Management Svc

▼ POST /api/jurisdiction/discover · Tool-use API calls

AI LAYER

AWS Bedrock + Tool Use

Discovery Agent · Web Search Tool · Checklist Generator · → Web (runtime search)

▼ Cache profile · Read approved · CRUD cases

DATA

DynamoDB and SQLite (local)

JurisdictionProfile 30d TTL · Cases · Checklists · Resources · Pre-seeded NL Kindertelefoon, Meldknop.nl

KEY CONNECTIONS

Frontend → Backend
HTTP REST calls

Backend → AI Layer
Tool-use API calls

AI → Web
Runtime web search

Services → SQLite
Cache, Read, CRUD

Case Mgmt → AI
Generate checklists

LEGEND

- Frontend
- Backend
- AI Layer
- Data
- External

DEMO FLOW Teacher enters school → AI discovers jurisdiction → AI searches resources → Teacher reviews & approves → Role-specific views

The Solution

Usage of Kiro/Miro

Extra context in Miro added to prompt

We added extra snippets (like official gov docs) that feed into the prompts and info shown here

Miro -> Kiro -> Build!

We asked Kiro to grab the updated specs

❤️ Miro MCP

Easy back and forth! But bigger context = takes longer
